

DRINKING WATER NOTICE

Microcystins monitoring requirements not met for CONNEAUT water system

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the week of 12/26/21-1/8/2022 we did not monitor for microcystins and therefore cannot be sure of the quality of our drinking water during that time.

What Should I Do?

This notice is to inform you that CONNEAUT public water system did not monitor, and report results for the presence of microcystins in the public drinking water system during the week of 12/26/21-1/8/2022 monitoring period, as required by the Ohio Environmental Protection Agency. You do not need to take any action in response to this notice.

What is being done?

Upon being notified of this violation, the water supply was required to have the drinking water analyzed for total microcystins according to their current monitoring schedule. The water supplier will take steps to ensure that adequate monitoring will be performed in the future.

A sample was (will be) collected on 1/19/2022.

Sample results and additional information may be obtained by contacting CONNEAUT PWS at:

Contact Person: Richard Neubauer.

Phone Number: 440-593-7437.

Mailing Address: wfp@conneautoh.org

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
