ADDENDUM 1

To: All Bidders

RE: Request for Bid Gem County Weed Control Building Addition

The following are changes made to the RFB Gem County Weed Control Building Addition

- a) Question 1: It appears the City of Emmett has a sewer man hole on Dion Street next to the Gem County Weed Dept office, but is close to a power pole. This will make for an unsafe excavation for sewer connection to the city line. Do you know if there is an alternative location for a sewer connection at Gem County Weed Dept.?

Answer:

Staff has met with the Superintendent of Emmett Public Works to discussion options for another sewer connection. Clint Seamons has provided a location for the sewer connection, which is attached on Exhibit A. With this new sewer connection there is connection fee of approximately \$4,850.00.

- b) All bids should comply with the answer above and placement/location of a second sewer connection as depicted on Exhibit A.

There are no other changes. If you have already submitted your response to this RFB and this addendum will alter your response, you may submit an updated response. **Remember to sign the acknowledgment below and submit it with your qualification materials.**

Thank you for your interest in supplying the needs of Gem County.

Please acknowledge receipt of this amendment by completing the spaces below, and please return this acknowledgement with your Response.
