**RE: Cherry Heights No 2 Subdivision – Gem County, ID
Rezone Application**

Dear Ms. Kharri:

On behalf of Hess Properties, LLC, we are pleased to submit the attached rezone application and required supplements for Cherry Heights No 2 Subdivision.

Site & Background Information

The subject property is an approximately 23.81-acre parcel, identified as Parcel No RP06N01W201200, located east of Wills Road between Sales Yard Road and South Slope Road in Gem County. The subject property is currently zoned A-2 (Rural Transitional Agriculture) and is designated on the Gem County Future Land Use Map as a County Residential Area and lies within Priority Growth Area 1. Adjacent properties to the north and west are zoned A-2 (Rural Transitional Agriculture). The property to the southeast, Parcel No RP06N01W201805, was rezoned to R-2 (Residential Transitional) by the Board of County Commissioners on October 16th, 2018, and is subject to Development Agreement Inst. No 321365, which was entered into on May 6th, 2019.

Background Information

A property boundary adjustment for parcels RP06N01W201200 and RP06N01W201805 has been tentatively approved to accommodate a configuration aligning with the proposed Cherry Heights No 1 and No 2 Subdivisions. The total acres of parcel RP06N01W201200 (Cherry Heights No 2) will be 23.81 acres after the adjustment, and the total acres of parcel RP06N01W201805 (Cherry Heights No 1) will be 68.90 acres. The purpose of the property boundary adjustment was to create a parcel configuration to accommodate the integrated development of both phases of the proposed Cherry Heights Subdivision. The first phase of the subdivision has already received rezone approval, but the configuration of the property did not coincide well with the lot sizes and layout planned by the developer. As such, the property boundary adjustment was configured to accommodate a layout for the first phase that would be cohesive with the second phase of the project.

The subject application requests a rezone of parcel RP06N01W201200 to accommodate a future subdivision request for the second phase of the project.

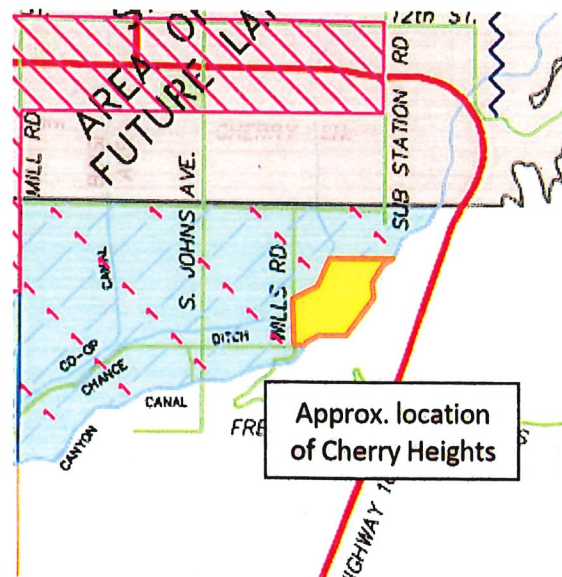

A preliminary plat application is forthcoming on parcel RP06N01W201805 for the first phase of the Cherry Heights Subdivision. Cherry Heights No 1 will be comprised of 37 single family residential lots and 1 common lot for a total of 38 lots. If this rezone request for parcel RP06N01W201200 is approved, we will be following up with a preliminary plat application for Cherry Heights No 2, the second phase of the Cherry Heights Subdivision.

We held a neighborhood meeting on Tuesday, October 25, 2022 for our preliminary plat application for Cherry Heights No 1. This meeting was attended by at least two dozen neighbors, who expressed numerous concerns about the overall Cherry Heights Development. In this narrative, we will discuss how we have addressed these concerns for the second phase of the development

Comprehensive Plan

The subject property lies within a County Residential Area, specifically Priority Growth Area 1. Consistent with Gem County's Comprehensive Plan, this rezone will ensure that development of this parcel does not detract from the rural character of the area and does not burden the Gem community with the cost of development. In Priority Growth Area 1, densities at 1 unit per 1 acre are allowed.

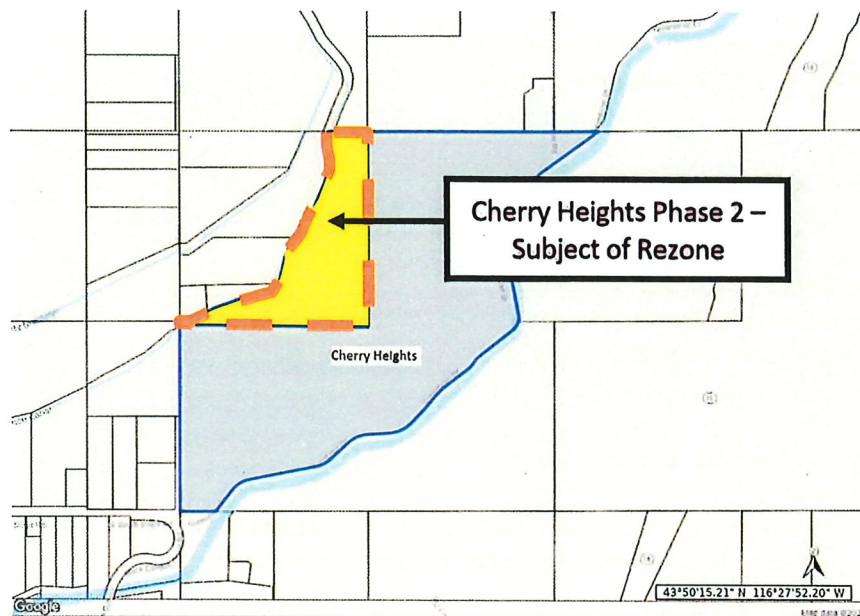

Cherry Heights will help the Gem community achieve many of its Comprehensive Plan goals and policies. The Housing Element of the Comprehensive Plan encourages development that conserves open space, reduces unnecessary cost, and provides current and future residents with quality housing choices. Both phases of the Cherry Heights Subdivision have been designed to conserve open space and integrate with their surroundings. Housing Policy 3.1.8 encourages rural residential development in areas where it is compatible with existing agricultural and ranching development. We have designed Cherry Heights with single-family homes on large, 1-acre lots to complement the existing agricultural character and without detracting from the natural beauty of the area.

Further, Residential Land Use Policy 12.13 encourages the provision of quality and diverse housing, as well as creative subdivision designs, of all prices for present and future residents. We have met with neighbors and coordinated with numerous agencies to ensure the lots provided within this development will provide a foundation for high quality homes and will not negatively impact neighboring properties. We have also utilized frontage along the Black Canyon Canal to provide residents with access to open space near their homes.

Rezone

The proposed rezone will accommodate the second phase of the Cherry Heights Subdivision, which will propose single-family homes on 1-acre lots. We have designed the Cherry Heights Subdivision to be harmonious with and appropriate for the existing agricultural character of the area. Single-family homes on large 1-acre lots would not change the essential character of the area and will provide housing options to future residents seeking a rural lifestyle. Additionally, the

development is being designed to utilize frontage along the Black Canyon Canal as open space, providing residents with scenery and recreational opportunities that draws on the area's agricultural heritage.

We have conducted numerous studies prior to submitting this application to ensure that the Cherry Heights Subdivision will not be detrimental to the public, health, safety, or welfare of the community. At the neighborhood meeting held on October 25, 2022, neighbors expressed several concerns, including how growth in the area would impact traffic on Wills Road. A Traffic Impact Study (TIS) completed by CR Engineering, Inc. in June 2022 found that this development is anticipated to have minimal impacts on the existing transportation system. Neighbors also expressed concerns about whether the soil in the area is appropriate for septic systems. At this time, Atlas Technical Consultants, LLC is conducting a nutrient pathogen (NP) study to ensure that the soils, geologic conditions, and water resources in this area can accommodate the number of proposed septic systems. Another concern expressed by neighbors was how the number of new wells would affect the area's water supply. We are working with well companies familiar with this area to ensure that there is adequate supply to accommodate this development. If approved, this zone change will not negatively impact the delivery of public services in this area or impose additional costs upon current residents of Gem County. We are currently coordinating with the Gem County Fire District #1 to obtain a waiver for the proposed block length and road length within the development. Additionally, we are working with the Fire District to address any additional requirements for mitigation.

Conclusion

Cherry Heights No 2 is being designed to ensure consistency with Phase 1 and compatibility with adjacent land uses and anticipated development in the area. We have taken steps to mitigate the public's concerns with the initial rezone and the first phase, and these changes will be carried over into the second phase; all studies that have been conducted or are underway include both phases. Cherry Heights No 2 will provide quality and diverse housing options to residents of Gem County. Residents will enjoy proximity to a full-service community in Emmett as well as access to recreational opportunities across the County.

Should you have questions or require further information to process these applications, please feel free to contact me.

Sincerely,
KM Engineering, LLP

STAFF REPORT

APPLICATION DESCRIPTION: REZONE (A-2 TO R-2)

FILE NUMBER(s): RZ-22-014

PLANNING AND ZONING COMMISSION HEARING DATE: May 8, 2023, 6:00pm

PROPERTY OWNER: Cherry Heights Development, LLC
2775 W Navigator Dr Ste 110
Meridian, ID 83642

APPLICANT: HESS PROPERTIES, LLC

SITE LOCATION: 3700 WILLS ROAD

STAFF PLANNER: Jennifer Kharri

1. APPLICATION SUMMARY:

The applicant, Hess Properties, LLC, on property owned by Cherry Heights Development, LLC, is requesting a rezone of property located at 3700 Wills Road. The application proposes a change from A-2, Rural Transitional Agriculture (5-acre minimum lot size), to R-2, Residential Transitional (1-acre minimum lot size). The application states the reason for the request is use the property for residential purposes and would be phase two of the Cherry Heights Subdivision. (Subdividing the property is a separate application and must be preceded by a rezone.) The property proposed to be rezoned is 23.8 acres in size and lies fully within Priority Growth Area 1 of the County Residential Area, as designated on the Future Land Use Map in the Comprehensive Plan. There is an existing single-family dwelling and outbuildings on site.

2. APPLICATION & PROPERTY FACTS:

A. Site Address/Location:

The property is located 3700 Wills Road and is within Township 6N, Range 1W, Sections 20 & 21 (Tax Parcel #RP06N01W201200).

B. Current Owner(s): Cherry Heights Development, LLC

2775 W Navigator Dr Ste 110
Meridian, ID 83642

C. Applicant(s): Hess Properties, LLC

D. Present Zoning: A-2, Rural Transitional Agriculture (5-acre minimum)

E. Present Comprehensive Plan Designation: County Residential Area, Priority Growth Area #1

F. Property Size: 23.8 acres

3. APPLICATION PROCESS FACTS:

A. Application Submittal:

The application for this item was received and deemed complete by the Development Services Department on November 7, 2022.

B. Notice of Public Hearing:

Notice of Public Hearing on the application for the Gem County Planning and Zoning Commission was published in accordance with requirements of Title 67, Chapter 65, Idaho Code and Gem County Code 11-15-5 on April 19, 2023. Notice of this public hearing was mailed to property owners within 300 feet of the subject property in accordance with the requirements of Title 67, Chapter 65, Idaho Code and Gem County Code 11-7-6 on April 7, 2023. The physical property was posted for the public hearing on April 10, 2023. Requests for all impact agencies' reviews were mailed on April 7, 2023.

Gem County Development Services received a reply letter from the following public impact agencies: Gem County Road and Bridge Department and ITD.

Public hearing notices were mailed to twenty two (22) parcels in the immediate vicinity. Five letters of opposition were received for the Commission public hearing.

C. Relevant Ordinances and Required Actions:

The subject application will in fact constitute a rezone as determined by Gem County Code. By reason of the provisions of the Gem County Code Title 11, Chapter 15, a public hearing is required before the Planning and Zoning Commission and the Board of County Commissioners on this matter.

D. History of Previous County Actions on Property: None.

E. Companion Applications: There are no companion applications to the Rezone. (Any future land divisions will require a subdivision plat application and any new buildings will require building permits.)

4. LAND USE

A. Existing Land Use(s): Single-family residential and irrigated pasture land.

B. Description of Character of Surrounding Area: The immediate vicinity includes a combination of active and inactive agricultural lands and single-family residential properties. The entire vicinity contains irrigated and/or irrigatable lands (Last Chance Ditch and Emmett Irrigation District). R-2 and R-3 zones are scattered throughout the A-2 zone.

C. Adjacent Comprehensive Plan, Zoning and Land Use:

	COMP PLAN DESIGNATION	ZONING DESIGNATION	LAND USE
North of site	County Residential Area, Priority Growth Area #1	A-2, Rural Transitional Agriculture and R-3, Rural Residential	Irrigated pasture land; rural residential; Last Chance Ditch
South of site	County Residential Area, Priority Growth Area #1	R-2, Residential Transitional	Irrigated pasture land; proposed Cherry Heights Subdivision
East of site	County Residential Area, Priority Growth Area #1	R-2, Residential Transitional	Irrigated pasture land; proposed Cherry Heights Subdivision
West of site	County Residential Area, Priority Growth Area #1	R-2, Residential Transitional and R-3, Rural Residential	Irrigated pasture land; rural residential/ Last Chance Ditch

D. Physical Constraints and Opportunities:

1. Wastewater and Domestic Water:

- a. Water: The site currently has a domestic well. Under today's Zoning Ordinance, future lots in the proposed R-2 zone may install individual wells, subject to Idaho Department of Water Resources standards.
- b. Septic: The site currently has an individual septic system and drain field. Under today's Zoning Ordinance, future lots in the proposed R-2 zone may apply for individual septic systems, subject to approval by Southwest District Health.

2. Vegetation: Pasture, shrubs and trees

3. Floodplain: The parcel lies outside of any FEMA mapped Floodplain.

4. Canals/Ditches/Irrigation: The property is served by Emmett Irrigation District and the Last Chance Ditch runs along the northern and western property line.

E. Subdivision Plat Information: If the rezone is approved, the intention is for this to be phase 2 of the Cherry Heights Subdivision.

F. Streets and/or Access Information:

The site has approximately 40 feet of frontage on Wills Road. The Road & Bridge Department submitted comments regarding the increased traffic concerns for future development.

5. COMPREHENSIVE PLAN POLICIES & GOALS [Staff comments and analysis are shown in *italics*.]

Staff finds the following policies in the Joint Comprehensive Plan are applicable to this application:

The Comprehensive Plan Future Land Use Map identifies the subject property as **County Residential Area, Priority Growth Area 1**. The County Residential Area is set aside for

primarily residential development. The long-term vision for this planning area is to maintain the uniquely rural character and to preserve non-conforming uses. The Priority Growth Area 1 allows densities down to one (1) unit per one (1) acre, or as the Zoning and Subdivision Ordinances currently allow.

The proposed R-2 zone designation would allow a minimum one (1) acre lot size for primarily residential uses. As noted in Section 4, several properties in the immediate vicinity are already zoned for 1-acre and 2-acre minimum lots. The proposed R-2 zone complies with the purpose of the County Residential Area and Priority Growth Area 1 policies.

The following policies have been set forth in the Housing Chapter of the Joint Comprehensive Plan (Chapter 3) and generally support the application:

3.8 - Rural residential and small ranchette type development shall be encouraged in areas where it is compatible with existing agricultural and ranching development.

If approved, the rezone may allow one –acre lots or larger on the subject parcel if approved through the subdivision process. Rezoning may have the effect of “encouraging” development since it establishes a change to the minimum lot size. After receiving public testimony, the Commission and Board should determine if the proposed R-2 zone is compatible with the area.

The following policy has been set forth in the Natural Resources and Hazardous Areas chapter of the Joint Comprehensive Plan (Chapter 6) and generally supports the application:

6.8 - Ensure that new development includes Health District approved site utilities to protect the quality of water in the county.

If the rezone is approved and the applicant proceeds with a subdivision application, Southwest District Health will be notified and new development will need to comply with their standards.

The following policies have been set forth in the Land Use chapter of the Joint Comprehensive Plan (Chapter 12) for future growth and are found to be relevant to this application:

12.1 – Respect the responsibilities and rights of land ownership.

12.3 – Ensure due process of land development is clear and concise and avoid unnecessary delays for citizens and businesses.

The applicant/property owner met with Development Services staff to review the application process for both rezoning and subdividing.

12.7 – Support agriculture and business by buffering agriculture and business from incompatible land use encroachment.

There are existing small-scale agricultural uses in the vicinity of this parcel. The application does not explicitly address how adjacent agricultural uses would be buffered through this development.

6. ZONING ORDINANCE

- A. Purpose Statement of Zone: Gem County Code 11-4-4A lists the purpose of the R-2 zone as follows: "To provide lands for the development of single-family dwellings." The R-2 zone has a one (1) acre minimum lot size requirement.

The applicant's intent is to create a residential subdivision which would be a second phase to Cherry Heights Subdivision proposed to the south of this property. (If the rezone is approved, a Standard Subdivision application must be filed to subdivide the property). The requested zoning would support this type of development. The subject site is large enough for such development, therefore this criteria is met.

B. Permitted Uses:

The subject site is currently zoned A-2 (5-acre minimum) and allows the following types of uses, either outright or as a Special Use Permit:

Agriculture, kennel, mining, utilities, some manufacturing, limited trade, entertainment and recreation, aircraft transportation, government services, limited private services (e.g. auto repair, construction yards), group quarters, various housing/residential uses, including halfway houses and single-family residential.

The proposed R-2 zone allows the following uses, either outright or as a Special Use Permit:

Commercial food stand, utility buildings, convenience store, park and ride lot, botanical garden/arboretum, health club, libraries, government services, parks, schools, swimming pools, sports arena, hospitals/clinics, bed and breakfast, daycare facilities, group quarters, single-family residential, multifamily residential, and manufactured home parks.

With the exception of a health club and a hospital (only allowed through a Special Use Permit in the R-2 zone) and duplex/multi-family residential uses allowed outright, staff finds the land uses in an R-2 zone to be more restrictive than uses allowed in the current A-2 zone. This is largely due to the mining and entertainment land uses allowed in the A-2 which are prohibited in the R-2 zone.

7. REQUIRED FINDINGS & STAFF ANALYSIS [Staff comments and analysis are shown in *italics*.]

According to Title 11, Chapter 15, Section 4., "No map amendments (rezones) shall be recommended for approval by the Commission or granted by the Board of Commissioners unless the following findings are made by the Commission or Board":

1. The requested amendment complies with the Comprehensive Plan text and Future Land Use Map;

Based on the Comprehensive Plan analysis provided in Section 5 above, staff finds there are several policies which support an R-2 rezone for the property. In Staff's estimation, most of the Comprehensive Plan Future Land Use Map relevant policies do support the rezone application to R-2 since the parcel falls within the County Residential Area, Priority Growth Area 1.

2. The requested amendment is not materially detrimental to the public health, safety, or welfare;

Staff finds an R-2 zone would allow approximately nineteen (19) additional dwellings (after dedication of new roads) on the subject parcel beyond what is permitted today. The potential increased septic use may be viewed as detrimental to the health, safety, or welfare when located on one (1) acre minimum lot sizes, but has not yet been verified by SWDH. SWDH will require a subdivision engineering report (SER) to determine soil types and feasibility for the septic systems and drainfields and will require perc tests for all building permits. The Engineering Report, including well log research, was required of the applicant as part of the rezone and Development Agreement on the adjacent property (phase 1) which will include this property (proposed to be phase 2) as part of the SER to determine well and septic impacts.

At build-out of the entire project (as proposed), staff estimates traffic to be increased substantially to the surrounding streets. Wills Road is identified as a Local Road and will require a 30-foot right-of-way dedication at the time of development. Also impacted will be Old Freezeout Road. To help the County more accurately assess traffic impacts on the public streets in the area, a Traffic Impact Study was required of the applicant as part of the rezone and Development Agreement on the adjacent property (phase 1) which included this property (proposed to be phase 2) and was approved by the County Engineer.

3. The subject property meets the minimum dimensional standards of the proposed zoning district;

The minimum lot size in the proposed R-2 zone is one-acre. The subject area to be rezoned is currently 23.81 +/- acres in size. A right-of-way dedication for future widening of Wills Road and Substation Road will reduce the net, developable acreage of the property but it does not change the fact that the site still complies with the minimum size and setbacks of the R-2 zone. The subject site could be developed to comply with the minimum dimensions for an R-2 zone.

4. The uses allowed under the proposed zoning district would be harmonious with and appropriate for the existing or intended character of the general vicinity and that such uses would not change the essential character of the same area;

A list comparing the allowed uses, as listed in the GCC 11-5-5 Matrix Chart, in the proposed R-2 zone with the existing A-2 zone is shown in Section 6 of this report. More intense uses are allowed with or without a SUP in the current zone than in the proposed R-2 zone. There are a few special uses allowed in the R-2 zone that would not be harmonious with the existing rural residential character of Wills Road, such as convenience stores and a hospital, but since these require special approval from the County as well as neighbor notification, they are not found to change the essential character of the area in and of themselves. As such, staff finds the uses allowed in an R-2 zone are compatible with the intended character of the area. This is largely due to the mining and entertainment land uses allowed in the A-2 zone with a SUP which are prohibited in the R-2 zone. The specific uses are listed according to each zone as allowed outright, prohibited or allowed with a Special Use Permit.

5. The effects of the proposed zone change upon the delivery of services by any political subdivision providing public services, including school districts, within Gem County's planning jurisdiction have been considered and no unmitigated adverse impacts upon those services will impose additional costs upon current residents of Gem County's planning jurisdiction.

The public service agencies/providers that responded to this rezone application were the Road and Bridge Department. Their comments show an adverse impact if this rezone application is approved.

The impacts of development of 23.8 +/- acres of R-2-zoned land into one-acre parcels could be expected to generate demands on public services beyond the current service demands.

If the applicant submits a subdivision request, all agencies/providers will review for compliance with their regulations at that time.

8. IMPACT AGENCIES NOTIFIED

Gem County Road Department
Gem County School District #221
Gem County Mapper
Idaho Department of Transportation
Gem Rural Fire District #1
Last Chance Ditch

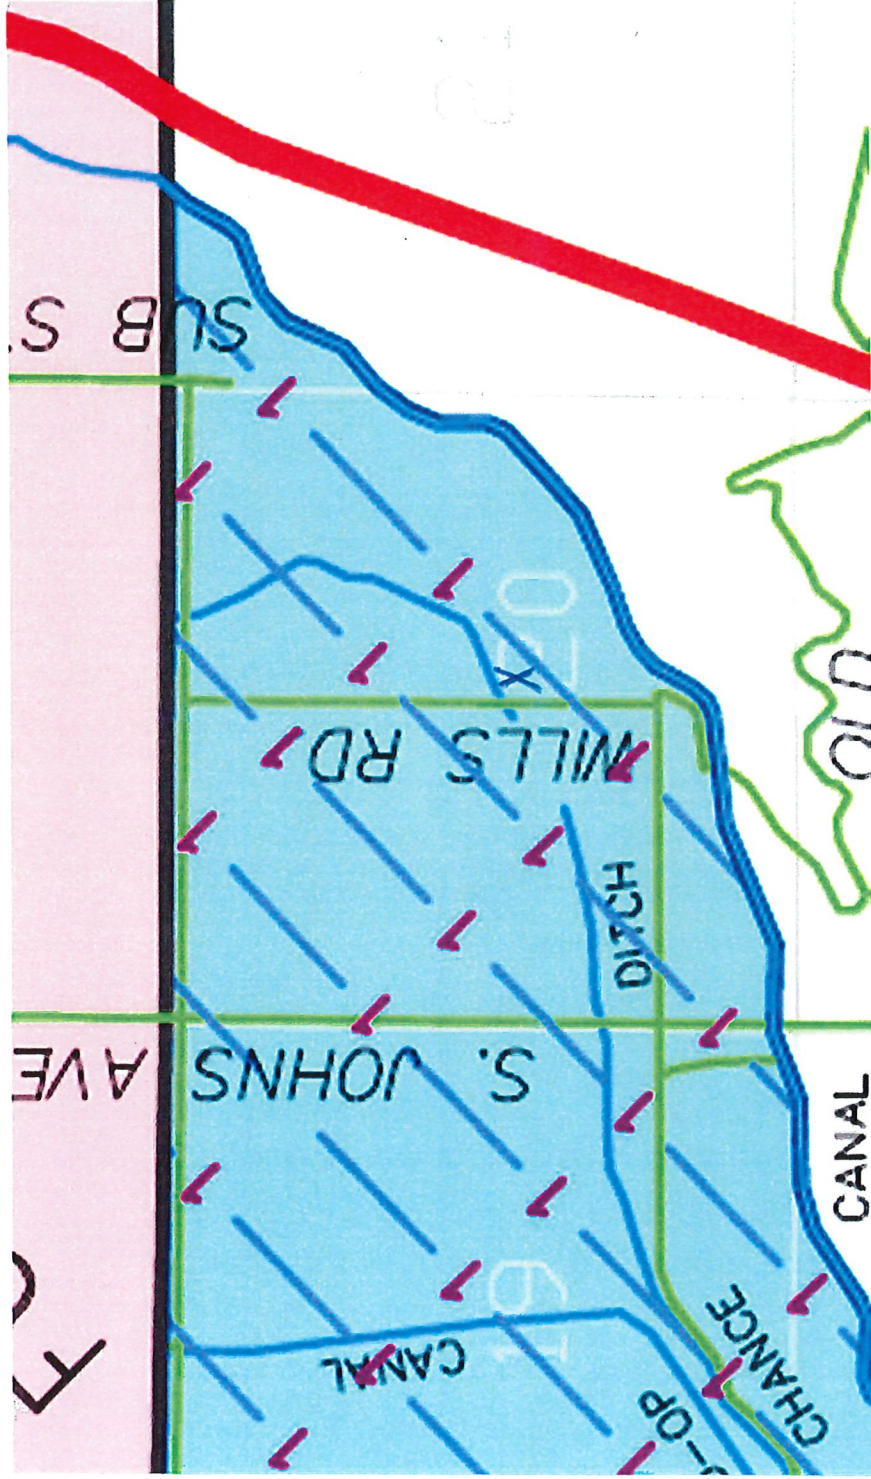

9. STAFF RECOMMENDATION

Staff finds that the proposed rezone application meets all of the required findings from the Zoning Ordinance listed in Section 7 of this report and conforms with the overall intent of the applicable Comprehensive Plan policies and Future Land Use Map. The R-2 zone appears to be appropriate for this location at this time. Based on the information presented to date and available to staff, we support this application. The Commission must rely upon any additional testimony provided during the public hearing when making its recommendation to the Board of County Commissioners.

Gem County Planning and Zoning Commission

April 26, 2023

Dear Chairman and Board Members of Gem County Planning and Zoning Commission,

Thank you all for serving our community. I know you are very busy with many things on your agenda and its impossible to know every detail. I love this community; I love growth and people! I believe you have its best interests at heart in your decisions.

Id like to address the Cherry Heights subdivision.
I hope you will give concern, study and answers in 3 areas:

Issue # 1. I request a county road and traffic study, beyond the developer, on the roads that will see increased traffic. Wills, are very narrow, almost shoulderless and in poor repair. Not TODAY, but if this subdivision is built, there will be MANY heavy equipment vehicles traveling as well as future daily increased traffic on those and entrance roads such as Cherry Lane, Substation Rd and S. Johns.

Forbes.com says Idaho and Wyoming tied for the highest rate of car ownership nationwide, with 96.2% of households in both states reporting access to at least one vehicle in 2021.

Car ownership rates by state from Motley website shows this for 2022 for Idaho:

State	Percentage of households with at least one vehicle	Average number of vehicles per household
Idaho	96.1%	3.0

These factual numbers will impact Emmet's roads far more than the developers "estimate"

Issue #2 is existing and future wells, protection for existing homeowners. The KM / developers state there is enough water for THEIR development but what about the existing homes with wells in the area with increased us and no more agriculture to replenish the ground water supply. What is YOUR plan to protect your citizen's existing wells in the area? Will the City or County dig new wells in a timely manner at NO further expense to homeowners in the area? Will the developer? Has there been any accurate water studies? How will you protect existing citizens?

Boise/Kuna have seen wells drying up due to rapid development and have a long waiting list and ridiculous expense for new wells needed for existing homeowners. Middleton as well has experienced this.

BOISE, Idaho (CBS2)(KBOI) — Some wells in Southwest Boise are drying up. It's not because of the hot dry summers, but **in part because of development in the Boise area.**

KTVB 7 quotes "The development and growth of the area have impacted the wells. "As more and more subdivisions go in, less and less farmland is there. With less farmland, the aquifer doesn't get replenished," said Nick Estes, a nearby resident who just had a well dug before the company left town.

The above problems WILL occur HERE. I am presuming you fully understand land facts and am eager to hear your plan to protect existing wells and land/homeowners.

Issue #3 is a request to do a land study, in terms of layers and ability of the land to absorb rain, runoff, water, septic, etc. that will affect the homes. Please keep the zoning at 5-acre parcels to help prevent future problems for existing residents.

Thank you so much for your consideration to make growth compatible with existing residents! I will be part of the meeting via zoom to allow for others to fill the chairs.

😊

Gem County Planning and Zoning Commission

Re Wills Road development

Dear Commissioners,

We live at 2222 South Johns Avenue. We have serious concerns about the proposed development off Wills Road.

We are very concerned about water quality for the existing homes nearby and for this development if septic systems are installed at this density and with this topography. We are also very concerned about traffic affecting existing homes and this development. To add 37 or 60 homes to the traffic flow on Wills road and/or Substation, or the Canal Road, will be intense. The entrance near the southwest corner of the site near the complex intersection of Wills Road, the Canal Road and South Slope looks to create traffic congestion and accident risk. Currently there are approximately 70 homes accessing Substation directly. The increase by this development is remarkable and complicating for existing residents. If approved, this request sets a precedent and if the pattern continues it looks quite unmanageable. Who will pay to re-do this set of old roads?

The county has been through a long process preparing a new comprehensive plan. Hours and hours have been spent discerning what density and development approaches would benefit the county and protect existing neighbors. While the Cherry Heights application precedes the new comprehensive plan and may not be subject to it, your task as Planning and Zoning is to determine what is wise and appropriate. All the reasons why the new comprehensive plan chose a less dense zoning for the area including this parcel are still wise and appropriate for applications not governed strictly by the new plan. Please reject the application or ask them to revise it to meet the current comp plan which is a good plan going forward.

Sincerely,

Peter and Susan Dill

From: Deborah Weaver <dmfweaver@yahoo.com>
Sent: Thursday, April 27, 2023 12:54 PM
To: Stephanie Crays
Subject: Re: Development at 3700 Willis Road

I am writing to voice my opposition to the new development/rezone. This breaking up of large pieces of rural transitional agriculture ground needs to stop. The water table here will not support so many wells/septics in a relative small parcel. I have friends who have no water pressure on Star Lane and others in the Sand Hollow area who have had to drill new wells. We built a new house 2 years ago - drilled a new well and had to go down twice the depth of our old well (on the same property and are sucking up lots of sand (requiring expensive filters, etc.). Services such as law enforcement/EMS/road department are stressed to deal with the new developments that have already been put in.

Please reconsider leaving it 5 acres - even at that it's a lot of wells/septics. Our water is not unending.

Thank you,

Deborah Weaver

Office of the Administrator

Planning and Zoning

Attention: Olivia Mocnik Associate Planner

Regarding: Cherry Heights application to rezone A2 to R2

To maintain the small-town character & rural feel, it is a mistake to rezone the foothills from A2(5 acre) to R2(1 acre). The proposed subdivision, Cherry Heights, will spread urbanization into the rural county lands ultimately decreasing values of existing properties.

Other concerns include the 37 lots will put a stress on the aquafer, the septic systems will be leaching into the ground effecting ground water for existing properties, increased traffic on Wills Road. and S. Substation Road will affect the rural perception existing in the county today.

Community designing and planning needs to recognize the special qualities of Emmett that you can see when driving down the Freeze-Out Hill on Highway 16. From the Memorial Site, the Cherry Height Subdivision would not fit into the overall feel of our valley.

Sincerely, Donna Martin

Subject: Cherry Heights Application

Hi Stephanie,

Robbie Roberts, former Economic Developer for the City of Emmett here. I am writing in response to the Cherry Heights application and have serious concerns about the developer's responses relative to the availability of well water for the properties within this application.

I've reviewed both of the packet's documents and the developer has not answered whether a recognized expert believes there is sufficient groundwater to prevent loss of well water availability to existing properties near the development. Sorry, but asking local well companies to verify that there is sufficient water availability is a conflict of interest as these companies benefit from drilling new wells. An Idaho state-recognized authority needs to verify that sufficient water capacity exists that will provide sufficient water for the development and not harm existing water capacity for existing properties adjacent to the development.

The Water Rights Statement contains language that is unfamiliar to me; however, it appears that this is limited to water taken from the adjacent Black Canyon canal for landscaping purposes.

Until an Idaho state-recognized authority determines that there is sufficient well water capacity to accommodate the new development without negatively affecting the well water capacity of existing properties adjacent to the development, I would ask Planning & Zoning to reject the application until such guarantees can be verified.

Many thanks for the efforts of the Planning & Zoning Commission and the work by the Gem County Development Services department as Gem County is seeing new growth!

All the best...

Robbie Roberts

RE: Cherry Heights Rezone (Hess Properties LLC)

Dear Jennifer,

Gem County Road & Bridge Department (GCRB) has reviewed the Rezone Application of Hess Properties LLC, a proposed 38 lot subdivision located at 3700 Wills Road. Please see attached letter (Exhibit A).

If you have any questions, please contact me at 208-365-3305.

Thank you,

RE: Cherry Heights Standard Subdivision (Hess Properties LLC)

Dear Jennifer,

Gem County Road & Bridge Department (GCRB) has reviewed the Subdivision Application of Hess Properties LLC, a proposed 38 lot subdivision located adjacent to Wills Road. The subdivision in question has proposed two access points, one located on Wills Road and the second located on South Substation Road. During the Rezone process this subdivision had a Development Agreement (DA) with several conditions needing to be completed prior to submitting for a Preliminary Plat. One of these DA conditions were to perform a Traffic Impact Study (TIS). The applicant hired CR Engineering Inc. for this task. The study area was Sales Yard Road, Wills Road, South Slope Road, and Substation Road. The TIS illustrated hours of peak traffic flow and geometry of the subdivision traffic flows. The TIS did not address the road conditions of Wills Road.

Wills Road is a narrow local roadway under the Gem County Functional Class Map. This roadway was constructed of asphalt to a width of 17 feet. The asphalt on this roadway is in poor condition, it has transverse, longitudinal, and alligator cracking. Additional traffic generated from said subdivision will cause added stress to this roadway. GCRB has evaluated the roadway structure of Wills Road and has calculated the approximate cost to rebuild and widen this roadway. The cost to widen Wills Road would be approximately \$726,385.00, for the road reconstruction. See (Exhibit A).

Gem County has adopted Impact Fees in the fall of 2022, these fees were added to the build permit at the time of construction. With the proposed 37 Lots, the impact fees would be approximately \$270,000.00. This impact fee money would go to projects listed on Gem County capital improvement program. Wills Road is currently not listed.

GCRB recommends the following conditions be added to the subdivision if approved.

1. Applicant shall apply for a driveway approach permit with GCRB.
2. Applicant shall provide mitigation measures to reconstruct Wills Road.
3. Applicant shall construct, and pave all roadways within the subdivision to Gem County Road & Bridge 2007 Highway and Street Standards for Design and Construction ordinance. Table 4 page 14 See (Exhibit B)
4. Applicant shall provide GCRB the material proctors for construction of the roadways.

Email: gcrb@co.gem.id.us

5. Applicant shall provide GCRB with compaction test results for all road materials, subbase, pit run, road mix and asphalt. The compaction tests shall be a minimum of 92%.
6. Applicant shall hire an experienced paving contractor with a Public Works licensed in the State of Idaho that can perform this type of construction.
7. Approach, and roadways shall meet Gem County standards upon completion

If you have any questions, please contact me at 208-365-3305.

Subject: RE: Rezone 3700 Wills Rd

Good Afternoon, Stephanie -

After careful review of the transmittal submitted to ITD on April 13, 2023 regarding Rezone 3700 Wills Rd, the Department has no comments or concerns to make at this time. We anticipate that a development at that location will have little direct impact onto SH-16.

Please let me know if you have any questions or concerns.

Thank you!

Good Morning, Niki

I know right, but yes this is the REZONE they are submitting two different applications one is the Rezone and the other is the Subdivision PP, Now that we have a New Associate Planner hired Olivia Mocnik. I will most likely not be sending you any Minor Sub, or Subdivision PPs anymore. Mine will be Rezones and SUPs Lucky you. You have 2 of us now LOL. Hope this helps. Olivia did say you already emailed her for hers, now I just need my letter sorry....

Happy Thursday!!!!

Be Blessed
