

# Regional Land Use Monitoring Report (2005)

## UPWP Task # 5800

### Executive Summary

#### **Project Purpose:**

The Genesee Transportation Council (GTC) provides funding annually for the *Regional Land Use Monitoring Report* under its Unified Planning Work Program. This report provides information on the issuance of new building permits in 2005 to identify areas of growth within the Genesee-Finger Lakes Region (G-FL Region) that might require transportation planning and service modifications.

The G-FL Region is comprised of Genesee, Livingston, Monroe, Ontario, Orleans, Seneca, Wayne, Wyoming, and Yates Counties. The report analyzes the number of permits issued, total square footage, and total value for new buildings for each municipality within the region as well as the Transportation Management Area (TMA). The TMA covers Monroe County and the municipalities adjacent to Monroe County in Livingston, Ontario, and Wayne Counties, and the Town and City of Canandaigua. The analysis looks at the following categories and respective subcategories: "residential" (single-family, two-family, three or four-family, five-or more family, mobile homes/ trailers); "industrial;" "commercial" (offices/ banks, retail/ service, service stations, hotels/ motels); "community service" (hospitals/ health facilities, schools/ churches, public works/ safety, utilities); and "not elsewhere classified."

A three-year trend analysis is provided for permitted residential units in all nine counties; industrial and community service building permits are analyzed over the three-year period as well. A time series (or historical trend) analysis is provided for residential, industrial, and commercial development and subdivision approvals in the Transportation Management Area (TMA). In addition, data is provided for the Transportation Analysis Zones (TAZ).

#### **Project Methodology:**

The building permit data included in this report was collected through surveys sent to the municipal or county officials responsible for the collection and dissemination of such data in the nine counties. In six counties, these officials were, in most municipalities, the code or zoning enforcement officers; in some cases the municipal clerks. In Seneca and Wyoming Counties building permit application approval and inspection are the responsibility of the respective county building departments. Those two departments provided the data for their counties. The Monroe County Planning and Development Department's Division of Planning administered the surveys, received the responses from municipal officials in the County, and forwarded the data to the Genesee/ Finger Lakes Regional Planning Council.

Each municipality received a survey in January of 2006 asking for the requested data. The initial survey was followed up with a reminder postcard along with a telephone reminder to those municipalities that had yet to respond. In some cases, several calls were made to the appropriate parties, in an effort to acquire the requested information. Overall, data was collected for 166 of the 192 municipalities in the nine-county Genesee/Finger Lakes Region (86.4%).

### **Analysis Overview:**

As in previous years, the largest amount of development in the G-FL Region in 2005 was permitted in the eastern and southern portions of Monroe County, which comprise the TMA. The Town of Webster, Monroe County issued permits for the largest number of new residential units (233). The Town of Greece in the northwest portion of the County, issued the second most permits in Monroe County with 202 for a total of 220 units. Industrial and Commercial development patterns were similar in that the counties comprising the TMA (Monroe, Livingston, Ontario, and Wayne) issued the most permits for new structures in 2005. Wyoming County however reported 54 commercial permits in 2005; some of those likely for industrial buildings however, as those permit types were not separated.

Over the past twelve years (1994 – 2005), the majority of development in the TMA has been in the first ring suburbs of the City of Rochester and the eastern towns of Monroe County. Outside of Monroe County, the Towns of Victor, Farmington, Ontario, and Canandaigua issued permits for the largest numbers of new residential units.

Given that many conclusions can be drawn from the data on permitted building activity and property net physical change, tables are provided in appendices at the end of this report for the reader to use as a basis for their own needs and analysis. Overall, the report serves as an information resource for the GTC and others to view and analyze land use activity in the rural counties of the G-FL Region to identify growth areas and anticipate increased transportation needs associated with this growth.

## Introduction

The Genesee Transportation Council (GTC) provides funding annually for the *Regional Land Use Monitoring Report* under its Unified Planning Work Program. The purpose of this report is to provide information on new building permits by type, size, and value to identify areas of growth within the Genesee/Finger Lakes (G/FL) Region that will, as a result, require increased transportation planning and services.

The *Regional Land Use Monitoring Report* includes residential, industrial, commercial, and community service building permit data for all nine counties in the G/FL Region. Prior to 2000, the number of permits issued for commercial, industrial, and community service buildings was not available for Monroe County, and data on industrial and community service permits was not available for Wyoming County. The categories (and associated subcategories) for building permits data are as follows:

- Residential (single-family, two-family, three-or-four-family, five-or-more-family, and mobile homes/trailers)
- Industrial
- Commercial (offices/banks, retail/service, service stations, hotels/motels)
- Community Service (hospitals, schools)
- Not Elsewhere Classified

A three-year trend analysis is provided for permitted residential units in all nine counties and industrial and community service building permits are analyzed over the three-year period. This time-series analysis is based on this year's and the two previous years' land use monitoring reports pro-

duced by the Genesee/Finger Lakes Regional Planning Council.

In addition, a time series (or historical trend) analysis is provided for residential, industrial, and commercial development and subdivision approvals in the Transportation Management Area (TMA), as well as an inventory of residential permits issued in the Transportation Analysis Zones (TAZ) within the TMA outside of Monroe County for 2005.

The TMA includes Monroe County and the adjacent municipalities to the south and east as well as the City and Town of Canandaigua. Table 1 represents the municipalities that, along with Monroe County, comprise the Transportation Management Area.

**Table 1**

An analysis of the collected data on the number, value, and size of buildings permitted in 2005 is provided for each county as well as the TMA. Given that many conclusions can be drawn from the data on permitted building activity, tables are provided in appendices at the end of this report for the reader to use for their own needs and analysis.

## **Methodology**

The building permit data included in this report was collected through surveys sent to the municipal or county officials responsible for the collection and dissemination of such data in the nine counties. In six counties these officials were, in most cases, the code or zoning enforcement officers; in some cases the municipal clerks. In Seneca and Wyoming Counties building permit application approval and inspection are the responsibility of the respective county building departments. Those two departments provided the data for their counties. The Monroe County Planning and Development Department's Division of Planning administered the surveys, received the responses from municipal officials in the County, and forwarded the data to the Genesee/Finger Lakes Regional Planning Council.

Each municipality received a survey in January of 2005 asking for the requested data. The initial survey was followed up with a reminder postcard along with a telephone reminder to those municipalities that had yet to respond. In some cases, several calls were made to the appropriate parties, in an effort to acquire the requested information. Overall, data was collected for 166 of the 192 municipalities in the nine-county Genesee-Finger Lakes Region (86.4%).

The survey requested information on the number of permits issued, total square footage and total value for new buildings in the defined categories and associated subcategories. In addition, the same building permit information for buildings outside of these categories was requested along

with a description of the type of building(s) in the "Other" category.

The instructions for completing the survey as printed on the first of the two-page document were as follows:

*"Include only permits for the construction of new buildings in 2005. Do not include additions, repairs, decks, in-ground pools, etc. or buildings used for storage such as sheds and pole barns. Do not include permits for construction that was completed in 2005 but permitted in 2004. If the responses below include a town and a village on the same sheet, please denote this by listing them separately on the same line (example: T - 8/ V - 12)."*

For each of the nine counties, there is a discussion of new permitted building activity in 2005 and county maps of new residential units permitted in 2005 by municipality (Maps 1 - 9, Map 10 represents Permits for Residential Units for the nine-county G/FL Region). Maps of industrial, commercial, and community service building permits issued in 2005 are presented in maps of the nine-county G/FL Region (Maps 11-13).

The information and data provided for new permitted building activity data in Monroe County and the remaining portion of the TMA follows the same format. Maps 14 through 17 present the numbers of permitted residential, industrial, commercial, and community service buildings in the TMA in 2005. Map 18 shows the distribution of residential building permits among the Transportation Analysis Zones (TAZ) within the TMA outside of Monroe County.

The residential data for TMA municipalities were used in a time series analysis of number of new residential units by municipality for the years 1994 through 2005 in the Rural TMA and from 1994 through 2005 in Monroe County. The number of permits issued for industrial and commercial buildings from 1994 to 2005 in the Rural TMA are also presented and discussed in the same manner.

A three-year time series analysis of permits issued by municipalities in the Genesee-Finger Lakes Region that responded to the survey all three years are provided for permits that were issued for buildings across all categories. Data for Wyoming County between 2003 and 2005 are provided for all but industrial and community service buildings.

The data gathered on number of building permits issued, square footage, and value in each category/subcategory by municipality in and for the Rural TMA are presented in appendices A through H. The appendices are as follows:
