Regional Land Use Monitoring Report (2007)
UPWP Task # 5800

Executive Summary

Project Purpose:

The Genesee Transportation Council (GTC) provides funding annually for the *Regional Land Use Monitoring Report* under its Unified Planning Work Program. This report provides information on the issuance of new building permits in 2007 to identify areas of growth within the Genesee-Finger Lakes Region (G-FL Region) that might require transportation planning and service modifications.

The G-FL Region is compromised of Genesee, Livingston, Monroe, Ontario, Orleans, Seneca, Wayne, Wyoming, and Yates Counties. The report analyzes the number of permits issued, total square footage, and total value for new buildings for each municipality within the region as well as the Transportation Management Area (TMA). The TMA covers Monroe County and the municipalities adjacent to Monroe County in Livingston, Ontario, and Wayne Counties, as well as the Town and City of Canandaigua. The analysis looks at the following categories and respective subcategories: "residential" (single-family, two-family, three or four-family, five-or- more family, mobile/manufactured homes); "industrial;" "commercial" (offices/banks, retail/service, service stations, hotels/motels); "community service" (hospitals/health facilities, schools/churches, public works/safety, utilities); and "not elsewhere classified."

A three-year trend analysis is provided for permitted residential units in all nine counties; industrial, commercial, and community service building permits are analyzed over the three-year period as well. In addition, a time series (or historical trend) analysis is provided for residential, industrial, and commercial development, as well as subdivision approvals in the Transportation Management Area (TMA).

Project Methodology:

The building permit data included in this report was collected through surveys sent to the municipal or county officials responsible for the collection and dissemination of such data in the nine counties. In six counties, these officials were, in most municipalities, the code or zoning enforcement officers; in some cases the municipal clerks. In Seneca and Wyoming Counties building permit application approval and inspection are the responsibility of the respective county building departments. Those two departments provided the data for their counties. The Monroe County Planning and Development Department's Division of Planning administered the surveys, received the responses from municipal officials in the County, and forwarded the data to the Genesee/Finger Lakes Regional Planning Council.

Each municipality received a survey in January of 2008 asking for the requested data. The initial survey was followed up with a reminder postcard along with a telephone reminder to those municipalities that had yet to respond. In some cases, several calls were made to the appropriate parties in an effort to acquire the requested information. Overall, data was collected for 174 of the 192 municipalities in the nine-county G -FL Region (90.6%).

Analysis Overview:

The greatest amount of development in the G-FL Region in 2007 was permitted mainly in the "outer-ring" suburbs of the City of Rochester, Monroe County. The Town of Henrietta issued 150 residential building permits comprising the largest number of new units (263). The Town of Webster, a suburb northeast of Rochester, issued 140 permits for 141 new units, and the Town of Greece, a suburb northwest of the city, issued 121 permits for a total of 126 units. It is important to note however, that while these towns have witnessed the most growth and development in the region for the past four to five years, their total numbers of new permits (as well as units permitted) have been gradually decreasing during this same period. This general pattern is also apparent in other high growth municipalities such as in the towns of Brighton, Chili, Ogden, Parma, Penfield, Perinton, Pittsford, and in the City of Rochester.

Industrial and Commercial development patterns remained similar to past years in that the counties and municipalities comprising the TMA issued the most permits for new structures in 2007. Wyoming County reported 62 commercial permits in 2007; some of those likely for industrial buildings however, as those permit types were not separated.

Over the past fourteen years (1994 – 2007), the majority of development in the TMA has been in the second, or outer, ring suburbs of the City of Rochester- the only exceptions being the city itself, and the Town of Brighton… each of which have seen significant amounts of development during this period. Outside of Monroe County, the Towns of Victor, Canandaigua, and Farmington (Ontario County), and the Towns of Ontario and Walworth (Wayne County) issued permits for the largest numbers of new residential units over the fourteen year time frame.

Given that many conclusions can be drawn from the data on permitted building activity and property net physical change, tables are provided in appendices at the end of this report for the reader to use as a basis for their own needs and analysis. Overall, the report serves as an information resource for the GTC and others to view and analyze land use activity in the rural counties of the G-FL Region to identify growth areas and anticipate increased transportation needs associated with this growth.

Introduction

The Genesee Transportation Council (GTC) provides funding annually for the *Regional Land Use Monitoring Report* under its Unified Planning Work Program. The purpose of this report is to provide information on new building permits by type, size, and value to identify areas of growth within the Genesee -Finger Lakes (G -FL) Region that will, as a result, require increased transportation planning and services.

The *Regional Land Use Monitoring Report* includes residential, industrial, commercial, and community service building permit data for all nine counties in the G -FL Region. Prior to 2000, the number of permits issued for commercial, industrial, and community service buildings was not available for Monroe County, and data on industrial and community service permits was not available for Wyoming County. The categories (and associated subcategories) for building permits data are as follows:

- Residential (single-family, two-family, three-or-four-family, five-or-more-family, and mobile/manufactured homes)
- Industrial
- Commercial (offices/banks, retail/service, service stations, hotels/motels)
- Community Service (hospitals/health facilities, schools/ churches, public works/safety, utilities)
- Not Elsewhere Classified

A three-year trend analysis is provided for permitted residential units in all nine counties and industrial and community service building permits are analyzed over the three-year period. This time-series analysis is based on this year's and the two previous years' Land Use Monitoring Reports produced by the Genesee/Finger Lakes Regional Planning Council.

In addition, a time series (or historical trend) analysis is provided for residential, industrial, and commercial development and subdivision approvals in the Transportation Management Area (TMA).

The TMA includes Monroe County and the adjacent municipalities to the south and east as well as the City and Town of Canandaigua. Table 1 represents the municipalities that, along with Monroe County, comprise the Transportation Management Area.

An analysis of the collected data on the number, value, and size of buildings permitted in 2007 is provided for each county as well as the TMA. Given that many conclusions can be drawn from the data on permitted building activity, tables are provided in appendices at the end of this report for the reader to use for their own needs and analysis.

Methodology

The building permit data included in this report was collected through surveys sent to the municipal or county officials responsible for the collection and dissemination of such data in the nine counties. In six counties these officials were, in most cases, the code or zoning enforcement officers; in some cases the municipal clerks. In Seneca and Wyoming Counties building permit application approval and inspection are the responsibility of the respective county building departments. Those two departments provided the data for their counties. The Monroe County Planning and Development Department's Division of Planning administered the surveys, received the responses from municipal officials in the County, and forwarded the data to the Genesee/Finger Lakes Regional Planning Council.

Each municipality received a survey in January of 2007 asking for the requested data. The initial survey was followed up with a reminder postcard along with a telephone reminder to those municipalities that had yet to respond. In some cases, several calls were made to the appropriate parties, in an effort to acquire the requested information. Overall, data was collected for 174 of the 192 municipalities in the nine-county Genesee-Finger Lakes Region (90.6%).

The survey requested information on the number of permits issued, total square footage and total value for new buildings in the defined categories and associated subcategories. In addition, the same building permit information for buildings outside of these categories was requested along with a description of the type of building(s) in the "*Other*" category.

The instructions for completing the survey as printed on the first of the two-page document were as follows:

> *"Include only permits for the construction of new buildings in 2007. Do not include additions, repairs, decks, in-ground pools, etc. or buildings used for storage such as sheds and pole barns. Do not include permits for construction that was completed in 2007 but permitted in 2006. If the responses below include a town and a village on the same sheet, please denote this by listing them separately on the same line (example: T – 8/ V – 12)."*

For each of the nine counties, there is a narrative, as well as county maps depicting new permitted building activity in 2007 (Maps 1 – 9, Map 10 represents Permits for Residential Units for the nine-county G-FL Region). Maps of industrial, commercial, and community service building permits issued in 2007 are presented in maps of the nine-county G-FL Region (Maps 11-13).

The information and data provided for new permitted building activity data in Monroe County and the remaining portion of the TMA follows the same format. Maps 14 through 17 present the numbers of permitted residential, industrial, commercial, and community service buildings in the TMA in 2007. Map 18 shows the distribution of residential building permits among the Transportation Analysis Zones (TAZ) within the TMA outside of Monroe County.

The residential data for TMA municipalities were used in a time series analysis of number of new residential units by municipality for the years 1994 through 2007 in the Rural TMA and from 1994 through 2007 in Monroe County. The number of permits issued for industrial and commercial buildings from 1994 to 2007 in the Rural TMA are also presented and discussed in the same manner.

A three-year time series analysis of permits issued by municipalities in the Genesee-Finger Lakes Region that responded to the survey all three years are provided for permits that were issued for buildings across all categories. Data for Wyoming County between 2005 and 2007 are provided for all but industrial and community service buildings.

The data gathered on the number of building permits issued, square footage, and value in each category/subcategory by municipality in and for the Rural TMA are presented in appendices A through H. The appendices are as follows:

(The Town/Village of East Rochester did not return a survey and is therefore not included in the analysis.)

- Municipalities in Monroe County issued 947 residential building permits for a total of 1,160 new residential units in 2007. As has been the trend in recent years, the "outer-ring" suburban areas of the City of Rochester witnessed the most development. - In the category of new commercial buildings, 76 permits were issued in Monroe County. The Town of Penfield issued the most with 47 followed by Greece with 6. Penfield, however, did not specify between commercial and industrial permits, and may not have separated rehabilitation/reconstruction permits from actual new builds judging from the number of permits reported when compared to other municipalities.

Map 12 shows the number of new commercial building permits by municipality in the Genesee-Finger Lakes Region in 2007.

- Eight permits were issued for new community service buildings in Monroe County. The Town of Perinton issued four for a total value of $8,325,000, the Town of Greece issued two valued at $5.3 million total, and the Town and Village of Webster each issued single permits.

Map 11 shows the number of new industrial building permits by municipality in the Genesee-Finger Lakes Region in 2007.

- A total of 62 permits were reported for new commercial buildings in the County in 2007. It is unlikely that these are permits for new builds however, but rather, remodels or renovations to existing structures.
