Prepared for the Genesee Transportation Council

2019 Regional Land Use Monitoring Report

November 2020

This report was prepared by the Genesee/Finger Lakes Regional Planning Council for the Genesee Transportation Council under the Unified Planning Work Program (Task # 4220).

Mission Statement

The Genesee/Finger Lakes Regional Planning Council (G/FLRPC) will identify, define, and inform its member counties of issues and opportunities critical to the physical, economic, and social health of the region. G/FLRPC provides forums for discussion, debate, and consensus building, and develops and implements a focused action plan with clearly defined outcomes, which include programs, personnel, and funding.

Abstract

This report provides information on the issuance of building permits in 2019 to identify areas of growth within the Genesee-Finger Lakes Region (G-FL Region) that might require transportation planning and service modifications. The G-FL Region is comprised of Genesee, Livingston, Monroe, Ontario, Orleans, Seneca, Wayne, Wyoming, and Yates Counties. The report analyzes the number of permits issued, total square footage, and total value for buildings for each municipality within the region as well as within the Metropolitan Planning Area (MPA). The MPA is comprised of Monroe County plus the adjacent developed areas of Livingston, Ontario, and Wayne counties. The analysis looks at the following categories and respective subcategories: "residential" (single-family, two-family, three or four-family, five-or-more family, mobile/manufactured homes); "industrial;" "commercial" (offices/banks, retail/service, service stations, hotels/motels); "community service" (hospitals/health facilities, schools/churches, public works/safety, utilities); "mixed-use" (both vertical and horizontal. Includes multiple uses (residential, commercial, and retail) in one building or complex); and "not elsewhere classified."

Acknowledgments

The Genesee/Finger Lakes Regional Planning Council (G/FLRPC) would like to acknowledge the following individuals and their municipalities, counties, and departments for their efforts associated with the production of the *2019 Regional Land Use Monitoring Report*:

Introduction

The Genesee Transportation Council (GTC) provides annual funding for the *Regional Land Use Monitoring Report* (LUMR) under its Unified Planning Work Program. The purpose of this report is to provide information for building permits by type, size, and value to identify areas of growth within the Genesee-Finger Lakes (G-FL) Region that may, as a result, require increased transportation planning and services.

The *Regional Land Use Monitoring Report* includes residential, industrial, commercial, and community service building permit data for all nine counties in the G-FL Region. New in this report is the addition of a Mixed Use category. This includes subdivision applications and permitted demolitions, as well as rezoning and conversion applications and the number of upgrades and remodels per municipality. The categories (and associated subcategories) for building permit data are as follows:

- Residential (single-family, two-family, three-or-four-family, five-or-more-family, and mobile/manufactured homes)
- Industrial
- Commercial (offices/banks, retail/service/restaurants, service stations, hotels/motels)
- Community Service (hospitals/medical facilities, schools, government buildings)
- Mixed Use (both vertical and horizontal buildings encompassing multiple uses such as residential, commercial, and retail in one building or complex)
- Not Elsewhere Classified
- Subdivision Applications (containing 4 or more lots)
- Rezoning/Conversions (including number of lots and total acres)
-
- Upgrades/Remodels (includes all additions, alterations, repairs, decks, pools, sheds, etc.)
- Demolitions by permit (for Residential, Industrial, Commercial, and Other structures)

A five-year trend analysis is provided for permitted residential units in all nine counties and industrial, commercial and community service building permits are analyzed over the five-year period. This time-series analysis is based on this year's and the four previous years' Land Use Monitoring Reports produced by the Genesee/Finger Lakes Regional Planning Council (G/FLRPC).

The MPA consists of Monroe County plus the adjacent developed areas of Livingston, Ontario, and Wayne counties. Table 1 represents the municipalities that, along with Monroe County, comprise the MPA.

An analysis of the collected data on the number, value, and size of buildings permitted in 2019 is provided for each county as well as the MPA.

The data on permitted building activities are provided in appendices at the end of this report for the reader to use for their own needs and analysis.

Methodology

The building permit data included in this report was collected through surveys sent to the municipal or county officials responsible for the collection and dissemination of such data in the nine counties. In six counties, these officials were often the code or zoning enforcement officers and in some cases were the municipal clerks. In Seneca and Wyoming Counties, building permit application approval and inspection are the responsibility of the respective county building departments and thus these departments provided the relevant data. In Monroe County, the Planning and Development Department's Division of Planning administered the surveys, received the responses from municipal officials in the County, and forwarded the data to G/FLRPC.

As noted above, each municipality other than Seneca and Wyoming Counties received a survey in January of 2019 asking for the requested data. The initial survey was followed up with reminder e-mails and telephone calls to those municipalities that had yet to respond.

G/FLRPC received 83% of the region's responses from the survey that was administered. This represents 156 of the 188 reporting municipalities within the nine-county G-FL Region. Additionally, due to extenuating circumstances in 2020, 13.8% of the region's data was pulled from the New York State Department of State 2019 Annual Uniform Code Report. Over all, data was gathered from 98.4% of the region, accounting for 185 municipalities out of 188 having data available to use in this report.

Administering the 2019 Land Use Monitoring Report Survey in 2020 was met with unforeseen challenges. The Coronavirus pandemic and subsequent executive orders and mandates significantly changed the landscape and work environment for all across NYS and the country. On March 22nd, 2020, NYS on PAUSE went into effect closing all non-essential businesses and municipalities were affected by having much smaller, pared down staff reporting. This caused the building and public works departments to struggle to address the 2019 Land Use Monitoring Report Survey. NYS started reopening businesses in July of 2020. Things have not gone back to normal, nor caught up to pre-pandemic norms. As the decline in responses was understood, alternate data sources were sought which lead to the use of the NYS DOS 2019 Annual Uniform Code Report.

The Uniform Code Report is filled out annually by most municipalities. Its data very loosely over-laps with the topics of the G/FLRPC Land Use Monitoring Report Survey. The Residential building permit categories cover "One-family dwellings, two-family dwellings, and townhouses, new construction" and "Other residential occupancies, new construction." There is one question on the form that covers all categories under "Nonresidential buildings, new construction." And there are four questions covering the one "Upgrades/Repairs" section of the G/FLRPC Land Use Survey. These are as follows "One-family dwellings, two-family dwellings, and townhouses. Repairs, alterations, etc. of existing", "Other residential occupancies, repairs, alterations, etc. of existing", "Nonresidential buildings, repairs, alterations, etc. of existing", and "All other permits (pools, sheds, decks, plumbing, HVAC, etc)." The data reported on the G/FLRPC survey and the NYS DOS Uniform Code report did not always report or reflect the exact same numbers. This is the best stop gap measure available to report on the vast majority of the region's building permit data given the issues presented by the global Coronavirus pandemic.

The survey requested information on the number of permits issued, and the total square footage and total value for buildings in the defined categories and associated subcategories. The total square footage and total value is intermittently reported based on municipal records. In addition, the same building permit information for buildings outside of these categories was requested along with a description of the type of building(s) in the "*Other"* category. In some cases descriptions were not provided. The analysis conducted in this report is based on data provided by each LUMR survey contact.

The instructions for completing the survey were as follows:

> "Include permits for NEW construction of PRINCIPLE STRUCTURES permitted in the 2019 calendar year.
> **New** Report Remodels/Upgrade permits separately.
> Please do separate surveys for each municipality you represent and answer ALL questions in each section."

For each of the nine counties, there is a discussion of permitted building activity in 2019 by county and county maps of residential units permitted in 2019 by municipality. Maps 10 – 18 represent each County's residential permits. Map 19 represents the 5-year residential permitted units in the nine-county G-FL Region. Map 20 represents residential permits for the region in 2019 by municipality. Map 21 represents residential units in the nine-county G-FL Region by municipality in 2019. Data of industrial, commercial, community service building permits, and remodel/upgrade permits issued in 2019 are presented on maps of the nine-county G-FL Region. See Maps 22-25.

The information and data provided for permitted building activity in Monroe County and the remaining portion of the MPA follows the same format. Maps 26 and 27 present the number of residential permits, and permitted residential units respectively in the MPA region in 2019. Maps 28 through 30 present the number of permitted industrial, commercial, and community service buildings in the MPA in 2019. Map 31 shows the distribution of residential building permits among the Transportation Analysis Zones (TAZ) within the MPA outside of Monroe County.

The residential data for MPA municipalities were used in a time series analysis of the number of residential units permitted by municipality for the years 2010 through 2019. The number of permits issued for industrial and commercial buildings from 2010 to 2019 in the MPA outside of Monroe County is also presented and discussed in the same manner.

The data gathered on number of building permits issued, square footage, and value in each category/subcategory by municipality in, and for the MPA, outside Monroe County are presented in Appendices A through J. The Appendices are as follows:

Appendix A:
Number, Square Footage, and Value of Permits Issued for Residential Buildings – 2019 by county

NYS DOS 2019 Uniform Code Annual Report **Special Analysis**

The Coronavirus Pandemic of 2020 impacted the response rate for the Regional Land Use Monitoring Report surveying building permit data for 2019. As such, it was decided to try for supplemental data by using the annually reported data for the NYS DOS Uniform Code form. Unfortunately, there are some discrepancies between the Uniform Code Annual Report numbers and the Land Use Monitoring Survey data.

* = Information gathered from the NYS DOS 2019 Uniform Code Annual Report

** = Data reported on NYS Uniform Code differs from G/FLRPC Land Use Survey

When looking at these numbers, it paints a different picture with some municipalities' numbers being mildly or vastly different. Some of the counties' numbers resemble the same municipalities with the top permits either exact or very close in number. Other counties' numbers are vastly different with different municipalities holding the top permit spots or the numbers being extremely different.

The Uniform Code Report and the Regional Land Use Monitoring Report have similar categories but these are organized differently, which will contribute to differing data from each source.

In terms of non-residential new construction, the NYS DOS Uniform Code Annual Report makes no differentiation between usages as opposed to the Regional Land Use Monitoring Survey that breaks non-residential new construction down into Industrial, Commercial, Community Service, Mixed Use, and Not Elsewhere Classified.

Non-residential permits reported to the NYS DOS Uniform Code Annual Report run into the same issues as the residential permits. Due to the nature of this being a different survey with different categories, the data represents a different interpretation and definition of the categories. Given the circumstances that led to the use of this alternate data source, the categories are similar enough to make the data worthwhile. The majority of the time, the data lines up enough to indicate areas of growth across the region. For example, the Town of Jerusalem in Yates County has seen growth regardless of which data source is looked at.

Below is the top number of permits by municipality per county in Non-residential building permits from the Uniform Code Annual Report.

Transportation Analysis Zones (2019)

Addresses of residential building permits issued in 2019 were collected from municipalities located within the Metropolitan Planning Area (MPA) outside of Monroe County. Addresses were then geo-coded using Geographic Information System software to determine which Transportation Analysis Zone (TAZ) each permit was located in. Some addresses did not geocode accurately and were manually moved to the approximate location based on a review of aerial imagery. And not all municipalities reported addresses for the building permits. As the transportation analysis zones tend to follow road boundaries this should not impact the accuracy of the number of permits per transportation analysis zone.

Map 30 shows the number of residential permits issued in each TAZ in the MPA outside of Monroe County in 2019.

Definitions for Non-Residential Building Permit Categories – Based off Land Use Codes from the New York State Office of Real Property Services.

Commercial –includes offices, banks, retail, service, service stations, hotels/motels, restaurants, food service building permits.

Community Service –includes hospitals, medical-specific buildings, education facilities, schools, religious facilities, civic buildings, and government, police, and fire buildings.

Industrial –encompasses manufacturing or processing buildings and buildings associated with mining, quarrying, wells, or in the industrial product pipelines.

Mixed Use – can be both vertical and horizontal. Includes multiple uses (residential, commercial, and retail) in one building or complex. The traditional form seen in many communities have 2-3 story buildings on main streets with commercial on the ground floor and apartments on upper floors.

Mixed-use can also take the form of larger building projects that includes commercial and residential uses side by side but under the same ownership or development, one example being College Town in the City of Rochester though it can take many forms throughout the region.

Other – can be any other buildings that do not match the criteria within these categories
