

Olton FAST #7220036
Final Public Hearing Memo

The City of Olton applied for and received a Fire, Ambulance, and Service Truck (FAST) grant from the Texas Department of Agriculture (TDA) in 2021. The official grant contract term is June 1, 2021 to December 1, 2022. The grant provided \$500,000 to purchase one (1) ambulance, one (1) brush truck, and seven (7) sets of bunker gear to be used by the Olton EMS and Olton VFD.

All purchases have been made and the vehicles and equipment are currently in service by the EMS and VFD for the benefit of City of Olton residents. The EMS and VFD are also able to use these purchases to provide mutual aid as necessary.

Following the public hearing, the City will submit the official project completion report to TDA and will coordinate the final project review and closeout with its grant administrator.

The purpose of the public hearing is to collect comments, if any, about the FAST grant performance or benefit.
